West Kootenay EcoSociety organizes community conversations on climate change, income security

FOR IMMEDIATE RELEASE 02/09/2022

NELSON, BC: The West Kootenay EcoSociety has completed a series of community conversations on the links between climate change, income security and community resilience in the West Kootenay region of the provinces.

Organized in partnership with the Green Resilience Project, the conversations aimed to identify and document a wide range of perspectives on what community members need to build resilience and encourage local action on all the aspects of the climate crisis.

Climate change and income insecurity are two of the most urgent challenges facing BC residents. The conversation encouraged community members to discuss the connections between these issues, brainstorm solutions and identify what they need to put them into action.

Details from the conversation will be shared in the Green Resilience Project's final report, to be published in April 2022.
